Turn approved legal knowledge into reliable software

Learn the legal workflow before deciding what to automate.

LEARN

Ask why each paragraph is used.

STRUCTURE

Record conditions, exceptions and sources.

CHECK

Explain decisions and test changes.

Lawyers approve the reasoning. Rules assemble. AI supports review.

Basis: supplied internship posting. This is my understanding, not an assessment of the existing system.

MY PREVIOUS EXPERIENCE

Earlier research: problem finding and initial design

Bangladeshi legal question answering at North South University.

MY CONTRIBUTION

Literature review

Problem identification

Initial design

WHAT I LEARNED

Keep sections together

Retain the Act name

Check evidence coverage

I later moved to LLM inference work; another sub-team continued the legal project.

Earlier contribution based on my account. Recent demo is separate from the published research implementation.

Store the sources. Define the paragraph rules.

10 sample legal sources and 7 reusable document blocks, connected by source IDs.

CELL 1 · A SOURCE RECORD

ID: C167

Section: 167

Act: Criminal Procedure, 1898

CELL 2 · A PARAGRAPH RULE

Records available + M3 selected

→ include the records paragraph

→ cite C167

The source ID links a paragraph to the legal information used in its review.

Apply the rules and explain the selection

Same facts and rule version → the same prepared draft.

INPUT FACTS

Procedure: yes

Records: yes

Relief: yes

→

BASIC OUTPUT · SELECTED PARAGRAPHS

Jurisdiction → Facts → Procedure → Records → Relief

Decision record: M5 INCLUDED — records are available and M3 is selected.

Other blocks are skipped when their conditions fail; conflicting choices stop assembly.

Review the draft. Test the behaviour.

Check references and recorded updates, then rerun known examples after changes.

CELL 4 · EXAMPLE REVIEW OUTPUT

Search demo: C54 + P420 found

Draft review: 3 update warnings

Case summary: no accepted sources

CELL 5 · FOUR TEST GROUPS PASS

25 runs give matching results

4 cases match their expectations

Conflicts rejected; updates flagged

A warning prompts review. Passing tests is not a guarantee of legal accuracy.

Code and executed notebook: github.com/nafismam/UkilRAG

Cells 4–5: saved notebook outputs. Judgment notes and reference cases are synthetic; warnings need human assessment.
